

Company Profile

CEO's Message

In our lives we go through various difficult and hard ways, but we do not know what the good ones are. Since my beginning at work, I have been in a constant struggle and constant determination to walk the path of success and achieve it, and praise be to God, Who paid our determination and directed our vision towards the path of excellence. Since our inception in Egypillar Machinery Company, our goal is clear and specific, which is to be a difficult number that cannot be overcome in the field of heavy equipment, by introducing new and innovative ways at a time when the field of equipment is witnessing a remarkable positive development, which is what It made us increase our investment and competitive capabilities to build a competitive market. We also strive in the company to provide the best services to our customers from all sectors in order to meet their needs and desires, and to reach the highest levels of excellence in service provision. In conclusion, I am pleased to thank all the company's employees, including administrators, engineers and technicians and specialists, who spare no effort in order to achieve the message that we came to achieve.

SHERIF ABOU KHELLA
Founder & CEO

About EGYPIllAR

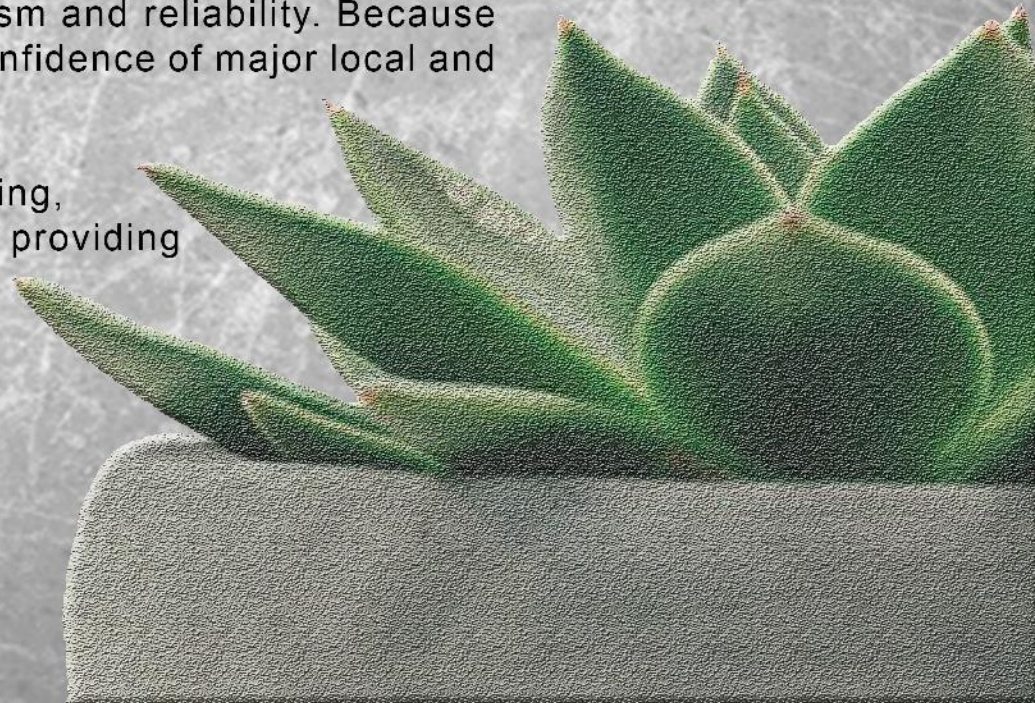

- EGYPIllAR is built on a stable foundation of integrity, reliability, accountability and a clear and powerful vision.
- EGYPIllAR Machinery is a trading firm and subsidiaries and part of KIG - Khella Investment Group companies.

We deal with the heavy equipment & Construction machinery with experience for more than 20 years ago. Which in turn contributes to achieving growth and sustainability in the heavy equipment sector. The company owns the latest technological equipment and machines related to its field of work, in addition to owning an able work team working to the highest degree of professionalism and reliability. Because of the high reliability that the company enjoys, it has been able to gain the confidence of major local and global companies.

The services provided by the company are concentrated in the areas of buying, selling, rental & operating heavy equipment, maintenance of equipment and providing spare parts for it.

We supply our clients across Egypt, Middle East & some African countries with their heavy equipment needs.

Today, We pride ourselves on being one of the most recognized names in the field of heavy equipment.

VISION

To be the pioneers in the field of heavy equipment by offering new and innovative solutions in light of the positive changes in the field of equipment and transport, and increasing our investment and competitive capabilities to build a competitive market.

MISSION

To cover our clients by providing reliable solutions, superior quality products and after services to our clients from the public and private sectors, in order to meet their needs and desires, and to reach the highest levels of excellence in service provision.

EGYPILLAR MACHINERY is the sole dealer for several european & International Companies and Manufacturers
Such as :

TML GROUP		Working Solutions for Steel, Construction & Mining
FABO		Crushers and Concrete Batching Plants
FIORI		Concrete Self Mixers and Dumpers
AMCO VEBA		Articulated Truck Mounted Cranes
ENERGY		Generators and Tower Lights
UN		Diesel and Electric Forklift
POWERKING		Hydraulic Breakers
MP-HT		Metal Frame Sweepers

EGYPILLAR MACHINERY is a trusted source for pre-owned.
We make the process of buying a piece of pre-owned equipment easier for our clients. One of the main buying used construction equipment is that it will save a lot of money and shipping costs for companies.

Overall, We are able to supply Construction, Oil & Gas, Mining, Quarry and Aggregate sectors with Brand New & Pre-Used heavy equipment for upcoming projects.

Just like with any other piece of equipment or vehicle, regular check-ups and service are always priority.

Our used fleets are all checked and verified and we stock leading brands such as Caterpillar (CAT), Doosan, Komatsu, Hitachi, Volvo and other famous brands.

We have a team of dedicated professionals:

Sales Department are well-qualified and updated with the latest technology on the products worldwide manufacturers to assess the customer requirement and to come up with the right solutions.

Finally, Quality and Commitment is our continuous aim to be recognized by our clients as we most reliable equipment companies.

We continuously stock an extensive fleet of all equipment categories :

- Earthmoving, Mining, Quarry & Construction Machinery
- Road Equipment
- Forklifts & Material Handling
- Generators & Tower Lights
- Parts and Attachments

A group of approximately 15 construction workers, mostly men, are posed in front of a large yellow excavator. They are wearing various safety gear including hard hats (yellow and white), high-visibility vests (orange and yellow), and work clothes. Some are standing, some are sitting on a wooden pallet. The excavator in the background has "A30F" and "VOLVO" visible on its side. The word "CASE" is also visible on a piece of equipment to the left.

MAINTENANCE

Inspection & Assessment

Our highly trained and experienced engineers perform a detailed check and analysis on all equipment and identify any refurbishment needs.

Mechanical Refurbishment

We perform all required mechanical, electrical, hydraulic and fabrication works in-house and use only quality replacement parts

Paint Refurbishment

We leverage our in-house painting and cosmetics division to maintain the best glowing look for our equipment

After Sale Service

We will support your equipment well after the point of sale. We have intimate knowledge of the equipment we sell so who else better to maintain your investment.

*We strive to provide the best equipment to help you
achieve peak performance capabilities*

Fabrication & Attachments

We manage the fabrication of everything earthmoving, cranes, lifting equipment buckets & attachments & surface miners.

Maintenance Consultancy

Our in-house project consulting is passionate about increasing production and lowering costs. With close to 20 years of in-field experience you are in the very best hands.

Equipment Design

We offer an in-house design team capable of designing specialist equipment in CAD. Our focus is on removing equipment & personnel to increase production while lowering costs.

Shipping & Dismantling

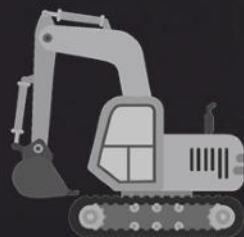

We can provide worldwide logistics services through our global partners, including dismantling, cleaning, packing, lashing, documentation & inspection.

WORKING SOLUTIONS FOR EXTREME CONDITIONS

TML is an expert for special machines used under the toughest climatical and mechanical conditions. The company focuses on steel mills and other metallurgical plants; it is the world's biggest manufacturer of mobile debricking machines in the iron and steel industry.

Its product range here includes telescopic excavators and special machines for slag skimming and charging machines and taphole drilling machines used in steelmaking. They drill and set tapholes, clean and break out ladles, converters and blast furnace runners, and carry out hot refractory repairs during operation.

But the TML portfolio also includes construction and mining machines. The special machines from TML are primarily supplied and adapted to the individual requirements of the steel mills, their service providers and OEMs, as well as mine operators and construction companies.

Attachment

Telescopic excavators and special machines for the toughest requirements in metallurgy, tunnelling, mining and construction

Radio Remote Control

UNIDACHS 110 series

Total weight: approx. 3 200 kg
 Max. reach: 5 000 mm
 Driving speed crawler: 2.9 km/h
 Rotation: 360°
 Diesel drive Power: 18.5 kW
 Remote controls: Standard

UNIDACHS 220 series

Total weight: approx. 5 300 kg
 Max. reach: 6 000 mm
 Driving speed crawler: 2.9 km/h
 Rotation: 360°
 Diesel drive Power: 55 kW
 Remote controls: Standard

UNIDACHS 320 series

Total weight: approx. 9 700 kg
 Max. reach: 8 600 mm
 Driving speed crawler: 2.7 km/h
 Rotation: 360°
 Diesel drive Power: 54 kW
 Telescopic rotary boom: 2 500 mm stroke
 Remote controls: Standard

UNIDACHS 430 series

Total weight: approx. 16 000-18 000 kg (depending on version)
 Max. reach: 10 800 mm
 Driving speed crawler undercarriage: 3.2 km/h
 Rotation: 360°
 Diesel drive Power: 97 kWAd
 Electric drive (alternative) Power: 90 kW
 Driver's cab: Standard (430 + 430K)
 Remote controls: Standard (430R + 430RK)

UNIDACHS 535 series

Total weight: approx. 21 000 kg
 Max. reach: 11 200 mm
 Driving speed crawler undercarriage: 2.5 km/h
 Rotation: 360°
 Diesel drive Power: 115 kWAd
 Telescopic rotary boom: 3 500 mm stroke
 Pump pressure: 330 bar
 Driver's cab: Standard
 Remote controls: Alternative and optional

UNIDACHS 640 series

Total weight: approx. 29 000 kg
 Max. reach: 13 800 mm
 Driving speed crawler undercarriage: 2.6 km/h
 Rotation: 360°
 Diesel drive Power: 129 kWAd
 Telescopic rotary boom: 3 200 mm; 3 700 mm; 4 000 mm stroke
 Driver's cab: Standard
 Remote controls: Alternative and optional

FABO are a manufacturer company that meet the needs of the construction and mining industry and exports our products to many countries at the same time. High quality, affordable price, ergonomic design and years of experience have made Fabo Company the top brand in the world.

MADE IN ITALY

FIORI GROUP, founded in 1942, with its headquarter in Finale Emilia (MO) Italy, and a distribution network in over 60 countries, designs, develops and manufactures off-road Concrete Batching Vehicles, Dumpers for the construction industry and Silos.

The company's product portfolio is rounded off by the Group capabilities in finding the most effective solution for any customer in making and transporting concrete on-site with a great flexibility, minimizing energy costs and reducing environmental impact.

Every day, thousands of cubic meters of concrete are mixed, transported and poured in many different building sites across the world through the FIORI GROUP's products, particularly in Piling, Foundation, Concrete products, Industrial & Residential buildings, Municipalities & Urban Infrastructures, Railways, Roads, Bridges, Canal Lining, Irrigation, Tunneling, Mining and Concrete Supplying.

For the last 80 years FIORI GROUP has streamlined its technological innovation, production processes, after-sales services, relationships with dealers and suppliers in designing and providing solutions to make on-site and on demand concrete with the right quality & quantity

LIFTING BEYOND HORIZONS

The Amco Veba truck mounted cranes are renowned for its highly technological level and our continuous developments ensure that our product meets our customer's requirement as well as possible.

Amco Veba offers you a wide product range and all cranes are produced in our state of the art production facility with dedicated research and development teams who are supported by the most advanced CAD equipment on the market today.

The Amco Veba product line includes more than 50 models of truck mounted cranes available in a large number of versions and accessories. This allows for adaptation to specific needs and applications.

The product range is made of articulated truck mounted cranes, telescopic boom cranes and special models; Amco Veba continuously updates and adapted the products to the market requirements.

ENERGY®

Power for life

To look to the future, you need the right energy.

Energy is a company that has always invested in research and innovation, and thanks to the thirty-year experience of its staff (constantly updated in new techniques and applications), it is a business that with high-quality tools and skills, provides its customers with standard and customised items, to meet even the most specific and complex production demands. The investments of Energy on the product are aimed at increasing its efficiency, functions and technical quality.

- Free Lift H2(mm) 100
- Travel Speed (Full Load) km/h 13
- Diver Motor kw 4X2
- Battery (Standard) V/Ah 48/500
- Max.Gradeability (Full Load) 18 %

POWERKING CORPORATION is a specialist in providing customized solutions to diverse problems encountered in rock breaking job sites.

Since 1992, POWERKING has been committed to supplying the construction industry with a wide range of technologically advanced rock breaking machineries. Our major products consist of Hydraulic Breakers, Rock Splitters, Super Wedge, Vibro Rippers, Concrete Wire Saw, Crushing Jaw, Core Drills, and their associated attachments.

Our products are characterized by their Low Vibration & Reduced Noise, which aim at protecting the environment without causing inconvenience or damages to the local community around your jobsite.
